# Schlumberger Information Solutions

SIS Fact Sheet

Schlumberger Information Solutions (SIS), an operating unit of Schlumberger Oilfield Services, is the global industry leader for the supply of integrated business solutions comprised of information management capabilities, advanced software systems, information technology infrastructure, and a complete range of expert services.

Oil and gas companies need to achieve a step-improvement in their business results and an enhanced profile in the financial and human resources sectors. To do this, they must embrace the fundamental transformations of the iEconomy – combining their specific energy industry knowledge and market position with innovative technologies, adaptive infrastructures, and new business models.

SIS is their preferred iTransformation partner, thanks to its unique vision of a worldwide service infrastructure, an ongoing commitment to advanced technology R&D, its investment in people, an unequaled breadth and depth of expertise in E&P disciplines, and its global network of expert knowledge.
